

The Recreation Company Limited

Initial Quotation for Playground Renovation and Upgrade

Whitney Street School

Blenheim

Date 15th April 2019

Dear Chair of BOT & Principal,

Attention Cheryl Wadsworth, Principal

Please find below our initial quotation to provide the school management with a comprehensive renovation and upgrade of the existing outdoor play environment.

This gives detailed options to illustrate how this well used play structure can be improved and brought up to an acceptable safety standard.

Our inspection report including suggested options is already with you.

Our quotation for this comprehensive renovation is \$91,500 plus GST.

Detail is attached in the appendix.

With thank you for the opportunity to provide this quotation.

Yours Sincerely

Rodie

20. Site and construction insurance

Notes

This quotation is set as a baseline for budgeting and fund acquisition. Depending on the school's success in funding and the level of input that the school community contributes the value of the project remains high. However, the bottom line in funding will vary.

- The figure quoted is based on materials required, professional construction input, design requirements and school input.
- All materials except for the pole maze and some entry way materials are priced as quality new.
- All structural poles are will be new and certified.
- All rope and fixing components will be quality new 24 and 28 mm synthetic (polyester and polypropylene).
- All decking etc will be quality new 90 x 40 H3 Pinus or similar.

Regarding school community input

- My experience is that well managed, most school communities are more than willing to spend energy, time and good humour to an achievable project.
 - This sort of project is ideal to bring communities together, achieve, enjoy doing so and really multiply the available funding base.
 - Within your school's parent base are many who have access to machinery, are practical, and will find this project just perfect.
- Our system of construction is designed around volunteer input.

- The volunteers and families then become the play facilities protectors.
- School input will be needed.

Plus, it is satisfying for all.

Any additional information please make contact.
