

Do you have any other comments to make on the proposed changes to the level of service?

YES – Your submission form is not complete. You have not asked the question “Do you approve of the NEW remote transfer stations in the designated Bays?” Obviously you are not interested in the views and concerns of the people who live in, or own, properties in these Bays. Did you just think you could force your decision on us by omission and expect us to fund it.

We are TOTALLY opposed to a remote refuse station being installed in Duncan Bay. Being a ratepayer of the Bay since 2005, we have been more than happy with the system of “pack in, pack out” which was started when the settlement was established in 1965. In all these years we have never seen rubbish lying around the streets of the Bay. Our concerns are:-

1. This transfer station will be an absolute eyesore, seen from most of the houses in the Bay. Where the proposed site is, has been designated “an outstanding natural landscape zone” by the Commissioner who refused the Bays application for a green waste burning heap, for that reason.
2. This proposed site is right beside our recreation ground and also beside the creek where our families have enjoyed swimming and recreation. This will no longer be possible, with the inevitable smells that will come from the rubbish skips i.e. fish waste, kitchen waste etc.
3. All of the above will encourage vermin, which has been adequately controlled for years by volunteers in the Bay.

4. We do not want or need this obscenity in our Bay and be expected to pay for it to boot. The old adage springs to mind “if it aint broke, don’t fix it”.

**DON’T DESTROY OUR BIT OF PARADISE – DUNCAN BAY.**
