MARLBOROUGH  
DISTRICT COUNCIL

My Wheelie Bin Submission  
In Havelock

It's not hard to keep waste down, it's a matter of thought; for some it may be convenient to have three large bins in their back yard. For many where are they to be kept, and will they ever be full.

It is just promoting laziness and another rate rise on top of the latest huge rate rise.

The council don't consider people on a benefit or superannuation e.g. (fixed income). Their only thought process is to make money which they waste.

A lot of people have never been able to earn the sort of money the council get gifted. The council have never known how hard it is to make ends meet.

It's their Dick Turpin attitude. They should remember they hung Dick and Shal-his horse. Councils have been building in rate rises for decades with no real progress in services for a lot of rate payers. In fact - services have been neglected. If people want wheelie bins there are already options available to them. Those that are out there create a hazard in the street.

If council want wheelie bins let them do so on the rates people have been paying through the nose for, for years.

It's a bit like the free water allocation we get now, that we've been paying for, for decades. If the Council adopted a culture of Zero Waste that would be a Huge Achievement and save Rate Payers a lot of Money
